# About Us

At Medmetal Engineering & Contracting, we specialize in delivering high-quality industrial solutions with a core focus on structural fabrication, piping works, Painting and Blasting, civil construction, and skilled manpower supply.

Our capabilities are built around the needs of the oil & gas, infrastructure, and manufacturing sectors across Qatar and the region.

# Our Core Services

## 1. Structural Fabrication

- Design, fabrication, and assembly of custom industrial structures and equipment
- In-house fabrication facilities with advanced machinery
- Experienced engineering team ensuring precision and quality
- Capability to fabricate heavy structures, platforms, skids, and supports
- Delivery of customized equipment based on client specifications
- Compliance with international welding and fabrication standards

## 2. Painting and Blasting

- Surface preparation through sandblasting, grit blasting, or hydro-blasting
- Application of industrial protective coatings (epoxy, polyurethane, fireproofing, etc.)
- Corrosion-resistant painting for steel structures, tanks, and pipelines
- High-performance coating solutions for extreme environments
- Skilled technicians trained in coating inspection and QA/QC procedures
- Adherence to SSPC, NACE, and ISO coating standards

### 3. Civil Works

- Foundation construction (equipment foundations, piers, slabs, etc.)
- Structural steel fabrication and erection
- Concrete structures built to industrial-grade standards
- Industrial building construction (warehouses, sub-stations, utility rooms)
- Earthworks, excavation, backfilling, and site development
- Full compliance with Qatar Construction Standards (QCS)

### 4. Manpower Supply - Specifications

- Supply of qualified engineers, supervisors, welders, riggers, fitters, fabricators, and technicians
- Workforce available on short-term, long-term, or project-based assignments
- Safety-certified personnel (NEBOSH, IOSH, OSHA, QHSE)
- Fast mobilization and replacement support
- Skilled in oil & gas, industrial, and construction environments

# Leading porta cabin suppliers in Qatar

Leading Porta Cabin Suppliers in Qatar

If you are looking for temporary storage solutions, office cabins, or worker accommodation, Medmetal provides top-notch, customizable, and durable porta cabins built for industrial and commercial use.

Porta Cabin Specifications

# Porta Cabin Specifications :

## High quality materials

- Durable steel frame structure
- Weather-resistant wall & roof panels
- Long-term performance in harsh climates

## Thermal & Acoustic Insulation

- High-grade insulation panels for temperature control
- Noise-reducing materials for comfort

## Ventilation & Lighting

- Proper ventilation through windows & vents
- LED lighting setups for energy efficiency
- Optional HVAC installation

## Modern & Contemporary Interiors

- Modular partitioning systems
- Customized layouts for offices, accommodation, or storage
- Flooring, ceiling panels, and furnishing options

## Safety & Security Features

- Lockable doors and windows
- Optional CCTV, access control & fire safety systems
- Electrical installations compliant with Qatar regulations

## Eco-Friendly Designs

- Energy-efficient construction
- Optional solar panel integration
- Reduced carbon footprint materials

# Why Medmetal?

**End-to-End Execution** - From design and fabrication to installation and commissioning

**Quality Assurance** – Strict adherence to international engineering standards

**Industry Expertise** – Experience across oil & gas, petrochemical, and industrial sectors

**Flexible Workforce** – Rapid deployment of skilled manpower for all project phases

**Safety Commitment** – Fully compliant with local and international HSE protocols
